

## Electrician

Sivyer Steel is seeking an experienced Electrician. This individual will be responsible for planning, layout and performing work necessary to install, maintain, repair and regulate plant electrical systems and components including motors, controls, generators, transformers, signal systems, etc. Qualified individual will also have experience wiring complicated circuits; calculating, balancing and regulating loads; repairing motors, starters, and controls; installing and wiring centralized control panels; and diagnosing, isolating and correcting electrical problems. Candidate must also be able to use appropriate test instruments, gear and equipment to test and insure proper operating functioning of circuits, controls, switches, etc.

The selected individual must be able to work under minimum supervision and guidance and will be required to use, maintain and safeguard calibrated certified equipment. This person must be able to work in a team environment.

5+ years current experience in a manufacturing type setting is required. Experience in a foundry is a plus.

Candidate must pass a pre-employment physical, substance screen and background check.

Please send resume to [employment@sivyersteel.com](mailto:employment@sivyersteel.com).

Sivyer Steel is an Equal Opportunity Employer.
